

CLEMENT KINGSLEY

Full Stack Developer | React • Next.js • React Native • Node.js

Lagos, Nigeria • +234 813 265 2982 • kingsclement684@gmail.com • linkedin.com/in/clement-kingsley-ba8a90202

PROFESSIONAL SUMMARY

Senior Full Stack Software Developer with 3+ years of experience building scalable web and mobile products for founders, startups, and growing businesses. Owns the full product lifecycle: system architecture, backend and API development, responsive frontend development, integrations, testing, and deployment. Delivers fast, maintainable, production-ready software that balances technical quality, user experience, and measurable business value, from MVP concept through production.

TECHNICAL SKILLS

Frontend & Mobile: React, Next.js, TypeScript, Tailwind CSS, Framer Motion, shadcn/ui, React Native, Expo

Backend & APIs: Node.js, Express, REST APIs, Webhooks, Stripe, Sentry, Firebase, JWT

Data & Cloud: PostgreSQL, Supabase, Neon, Convex, Firebase, MongoDB, Cloudflare, Vercel

Languages & State: TypeScript, JavaScript, HTML5, CSS, SQL, Redux, Zustand, Prisma

Tooling & Practices: Git, GitHub, Postman, npm, pnpm, VS Code, Technical Writing

PROFESSIONAL EXPERIENCE

Full Stack Developer | Power Prompts Lab | Remote

Jun 2026 – Present

Stack: Next.js 16 • React 19 • TypeScript • Tailwind CSS • Clerk • Neon • Postgres • Drizzle ORM • Stripe • Resend
PostHog • Upstash Redis • Zod • Vercel

- Building a mobile-first subscription learning platform that teaches practical AI skills to adults aged 55+, with a personalized 11-question onboarding quiz, bite-sized ChatGPT lessons, and other productive modules.
- Implemented a read-practice-quiz learning flow with saved progress and Stripe entitlement checks that gate monthly and yearly subscription content.
- Developed an admin dashboard for revenue, subscribers, users, and feedback, including charts, filtering, and CSV export for operational visibility.
- Added lifecycle email automation with cron-driven reminders, signed one-click unsubscribe, and PostHog funnel events from first visit through activated subscription.

Full Stack Developer | Perpetual Wealth | Remote

Jan 2026 – Mar 2026

Stack: Next.js 16 • React • TypeScript • Tailwind CSS 4 • shadcn/ui • Supabase • Anthropic Claude API • Framer Motion

- Architected a full-stack wealth management platform using Next.js 16 App Router with React Server Components, optimizing SSR performance and page load speed.
- Built a premium, responsive UI with Tailwind CSS 4 and shadcn/ui (26+ Radix UI components), implementing custom theming, animations (Framer Motion), and a cohesive design system.
- Developed 'Solomon AI,' a conversational AI financial assistant, by integrating the Anthropic Claude SDK for context-aware, real-time financial guidance.
- Integrated Supabase for authentication, Postgres database operations, file storage, and secure server actions, establishing a production-ready backend layer.
- Enforced end-to-end TypeScript type safety across React components, server actions, and API integrations, reducing runtime errors and improving developer velocity.

PROFESSIONAL EXPERIENCE (CONTINUED)

React Native / Expo Developer Trainer (AI-Augmented) | VTL Academy | Lagos, Nigeria May 2024 – Sep 2024

- Designed and led intensive mobile app development training programs using React Native and Expo, successfully onboarding and upskilling 30+ aspiring developers.
- Increased training program efficiency by 40% by integrating AI-powered tools for real-time code review, automated error detection, and learner feedback.
- Guided 30+ developers through full-cycle cross-platform (iOS & Android) app development projects, covering the complete SDLC from requirements gathering to production launch.

Frontend Developer (Contract) | Daniel Kregset | Oslo, Norway (Remote) Apr 2023 – Jul 2023

- Collaborated with client stakeholders to define technical and functional specifications for 5 core application features, translating business requirements into actionable React Native development tasks.
- Developed and deployed 3 production-ready React Native features, driving a 25% increase in user engagement within 2 months of release.
- Diagnosed and resolved 6+ critical bugs through systematic debugging, delivering a stable, error-free production release ahead of schedule.

EDUCATION

Bachelor of Science – Computer and Information Sciences 2019

Tai Solarin University, Ogun State, Nigeria

KEY ACHIEVEMENTS

- Completed Power Prompts Lab, a mobile-first subscription learning platform for adults aged 55+, with personalized onboarding, bite-sized ChatGPT lessons, and progress tracking.
- Implemented subscription billing and content access control using Stripe, Clerk, Neon Postgres, and Drizzle ORM, supporting monthly and annual plans.
- Built lifecycle email automation, PostHog funnel analytics, and an administrative dashboard with revenue, subscriber, user, and feedback reporting.
- Delivered v1 of an AI-powered wealth management platform using Next.js 16, Supabase, and the Anthropic Claude SDK, including an AI financial assistant and secure document workflows.
- Built a production-ready backend layer for Perpetual Wealth with authentication, Postgres operations, file storage, secure server actions, and end-to-end TypeScript type safety.
